

Exercise: Build a Power App (OJT/Co-op Tracker)

Objective:

You are designing a Power App to help students track the companies they have contacted for OJT (On-the-Job Training) or Co-op opportunities. Below is a structured list of fields that need to be included in the Power App.

Task: Define the List Fields

Create a **SharePoint List (or Dataverse Table)** named "**OJT Tracker**" with the following fields:

1. Required Fields:

- **Company Name** *(Single line of text)*
- **Recruiter Name** *(Single line of text)*
- **Email Address** *(Single line of text with email validation)*
- **Date of Contact** *(Date and time)*
- **Status of Application** *(Choice: Contacted, Interview Scheduled, Offer Received, Rejected)*

2. Optional Fields:

- **Company LinkedIn** *(Hyperlink)*
- **Phone Number** *(Single line of text with phone validation)*
- **Follow-up Date** *(Date)*
- **Notes** *(Multiple lines of text)*
